KS2 PRIMARY TEACHER CPD

“TEACHING FRACTIONS AT KS2”

This course will cover teaching the more advanced fraction techniques now required at KS2 including the four operations and equivalent fractions. This will be extended to consider problem-solving questions and will also include the use of visual techniques such as the bar model as well as highlighting potential misconceptions

We are happy to provide continued support for any maths topic following these sessions and we can arrange visits to your school on request.

**This is a free
Primary Teacher event,
booking is required**
